

Confused was I, between my aspirations and reality.

- Jayati Vijaywargiya

Greetings to the readers and my gratitude to the Hope Foundation for giving me this opportunity,

As you are aware, that I was fortunate to be one of the awardee of first, Late Prahlad P Chhabria Award for Best Outing student. Let me start from the beginning of this journey.

During my under graduation I could make to rank 1 in my University and thus was offered a 3 months GET Involved intern at Facility of Antiproton and Ion Research (FAIR), GSI, Darmstadt, Germany in 2017. I flew to the other Nation to explore the opportunities there and planning my Post graduation from abroad. The internship was very involving and demanded much effort too. I completed my work, which was, making a desktop application for Quench Calculations, which would be useful to them. I returned from my intern, published a paper of the same work, won best paper award for the same, got placed from campus, had valid GRE score, cleared GATE 2018, was going to get gold medal for my BTech. Course, all settled.

AT THIS MOMENT, Confused was I, between my aspirations and reality.

When I was working in Germany, every night a thought hindered me, 'I am working for them'. In 2016, I did my intern from DRDO, Dehradun and every night I slept with proud having a feeling, 'I am working for us'. So, what was stopping me to join Masters in India or try for R & D labs or organizations in India. The answer as perceived by me was, Recognition and Expectation. Expectation – of my well-wishers to see me flying high around the globe and my expectation with me to have little financial stability in upcoming to years. Taking about, recognition, I apologize, but my upcoming lines are rue, everyone to whom, I told I want to pursue my Masters or do some good research work in India, they said, "It is not worth putting so much effort here". In early 2018, I had a MS admission in one of the institute in France and a good package job in corporate sector, but my aspirations were compromising with the current reality. Also, in college, juniors look forward to their seniors, to guide them by their experiences. As, I was a very active member in event organization, sports, NSS, IEEE, ISTE, dance, March Past, etc. and many of juniors used to come to me and say, Boss (In my Institute seniors were called Boss) we look forward to you the way you manage extracurricular, social activity along with studies and they too told that they admired my influential personality. So, every time, in early 2018, when my juniors congratulated me for clearing interview stages for admission in France, I felt responsible, responsible for upcoming Women In Engineering. If I drain my brain, for recognition and expectations, may be I am responsible at least for few Women In Engineering, who would do the same.

That was the time, when I got a phone call around 12.30 pm, from Hope foundation and Research Centre, stating that, we have mailed you regarding this award you had applied for, which consisted of a citation, a medal and cash prize. I opened my phone, checked the mail, and all my were confusions cleared, now I have got recognition plus some savings, or initial funding for my MTech, so now the future path will automatically unfold. It is truly said, when your heart and mind are on same track, feet will definitely move on right track. So with this award, my reality and my aspirations came on same track and now I am moving forward to

proudly say and walk on the path of Women In Engineering of India, working in India and working for India.

I thank the Hope Foundation and Research Centre for this appreciation and award. And yes, from the previous batches of my Institute, top academic performers opted MS abroad, but I also talked about this in my Institute as an opportunity given to me by this award, and it made a difference. Women In Engineering I talked to think about their aspirations before the current trend. I don't have words to thank Hope Foundation and Research Centre for this award and the impact it made.

At the end I would like to quote the same lines, I said in the award ceremony of this award.

<p>निर्माणों के पावन युग में हम चरित्र निर्माण न भूलें! स्वार्थ साधना की आंधी में वसुधा का कल्याण न भूलें!! माना अगम अगाध सिंधु है संघर्षों का पार नहीं है किन्तु डूबना मझधारों में साहस को स्विकार नहीं है जटिल समस्या सुलझाने को नूतन अनुसन्धान न भूलें!! शील विनय आदर्श श्रेष्ठता तार बिना झंकार नहीं है शिक्षा क्या स्वर साध सकेगी यदि नैतिक आधार नहीं है कीर्ति कौमुदी की गरिमा में संस्कृति का सम्मान न भूले!! आविष्कारों की कृतियों में यदि मानव का प्यार नहीं है सृजनहीन विज्ञान व्यर्थ है प्राणी का उपकार नहीं है भौतिकता के उत्थानों में जीवन का उत्थान न भूलें!!</p>	<p><i>In the holy era of creations, let's not forget character building! Do not forget the welfare of VASUDHA, in the storm of selfishness !!</i></p> <p><i>Admittedly, there is a deep Indus, there is no cross of conflicts! But drowning is not the courage in the midst Don't forget to do the latest research on complex problem solving !!</i></p> <p><i>Well education even with strings of Modesty, Ideal, superiority will not be able to establish voice if it does not have a moral foundation!</i></p> <p><i>Do not forget the honor of culture in the dignity of Fame !!</i></p> <p><i>If there is no human love in the works of inventions Creationless science is useless, not a favor of a creature! Don't forget the rise of life in the ascendancy of materiality !!</i></p>
